

MICK GEORGE LTD RECYCLING STATEMENT 2009

Mick George Ltd have invested heavily in state of the art Materials Recycling Facilities (MRF) to combat the various legislative changes in the waste industry.

Environmental drivers such as the Waste Framework Directive, Landfill Directive, Landfill Regulation 2002, Hazardous Waste Regulations 2005, Producer Responsibility Regulations 2007, WEEE Regulations 2006, Landfill Tax, and generally stricter Environmental Legislation force responsible people to look at Greener solutions.

Within our MRF we segregate the following materials for recycling using mechanical and physical sorting methods.

- Clean inert soils
- Concrete & hardcore
- Green Waste
- Wood
- Paper & cardboard
- Non-ferrous metals
- Plastics
- Electrical & Electronic Equipment
- Plasterboard

We are constantly reviewing our methods and technologies to increase our recycling rates above the current level of 75% to satisfy our customers and Environmental demands whilst maintaining low costs.

Mick George Ltd are a responsible company providing sustainable solutions for the Environment and will strive to improve our recycling rates by innovation.
